Ontario Secondary School Literacy Test 2010 RESULTS

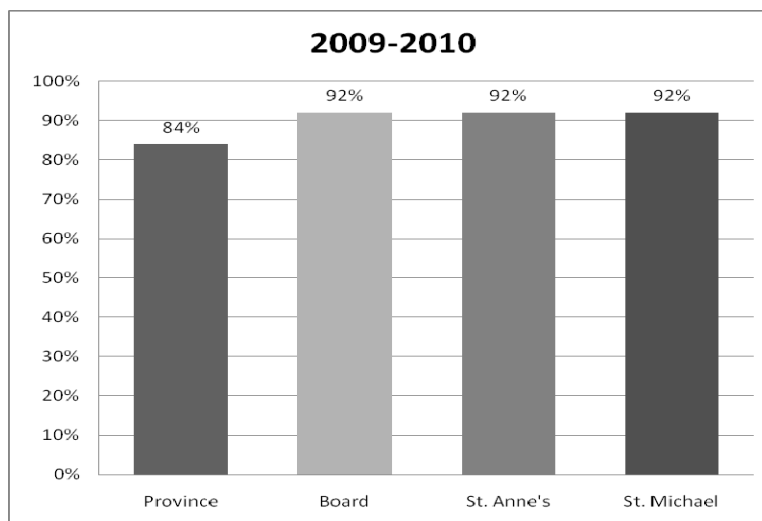

Information for Parents and Guardians

In April 2010, the students of St. Anne's Catholic Secondary School and St. Michael Catholic Secondary School participated in the Ontario Secondary School Literacy Test. All students will receive a complete analysis of their achievement. The provincial, board, and school results are listed below.

92% of students in the Huron-Perth Catholic District School Board were successful in their first attempt at this test. This is the highest rate of success in the province. However, we are committed to improving student achievement and closing the gap. We strive to create conditions that enable all students to meet or exceed the provincial standard. To achieve this:

- Our school and system literacy committees have analyzed the results and will continue to develop strategies to achieve improved student performance.
- These committees will continue to provide support to students and share effective instructional strategies with teachers.
- These committees will also provide strategies for students who need additional support to be successful on the Literacy Test, including the Ontario Secondary School Literacy Course. Students may enroll in this full-credit English course, which will be offered at both secondary schools in 2010-11. Students in our secondary schools have a very high success rate in this course.
- Strategic development and implementation reflects the specific needs of our students.
- Our Catholic secondary schools will continue to implement its School Improvement Plan, which emphasizes strategies to improve all students' literacy capabilities.

First-Time Eligible Students
Percentage of Fully Participating Students Who Were Successful
